**Agenda Item 13: Future role and method of work of the Committee
By Gen. Dr. Penny Radjendra**

Mr. Chair, distinguished delegates,

Indonesia believes that our UNCOPUOS Committee session would result in more positive, inclusive, and practical work outcomes from discussions on this Item Agenda by boosting global collaboration involving all relevant stakeholders.

Indonesia attaches the importance of multilateral discussion on outer space. In this regard, Indonesia appreciates the 66th COPUOS Committee session, which is being conducted in person in Vienna. Indonesia views that common interest of all stakeholders matters in reaching agreement on many pending issues of UNCOPUOS.

Chair,

My delegation would like to reiterate its position, a fixed force majeure procedure in a crisis situation, including for example a pandemic that we encountered from 2020 -2023 has caused the suspension of Legal Subcommittee and Committee meetings.

Indonesia also views annotated provisional agenda and other official documents should be published in advance before the session.

Moreover, my delegation would like to emphasize that any future discussion in the future, all issues, should be for the benefit of all humankind regardless of their level of development. Moreover, mainstreaming developing agenda in all issues is a key principle of our current and future negotiations.

Thank You
