

Logging Smart-Phone GNSS Raw Data

Dinesh Manandhar

Center for Spatial Information Science

The University of Tokyo

Contact Information: dinesh@csis.u-tokyo.ac.jp

Objectives

- Provide information about Software, APPs and Tools to log GNSS raw data from smart-phones
- Learn data logging methods using GNSS Logger APK for Android
- Explore possibilities of using raw GNSS data for various applications
- References
 - **Android GNSS Tutorial Resources**
 - <https://sites.google.com/view/gnsstutorial>
 - **GNSS Logger App**
 - To log GNSS raw data from Android device
 - <https://play.google.com/store/apps/details?id=com.google.android.apps.location.gps.gnsslogger>
 - **GPS Measurement Tools**
 - Matlab code for processing GPS measurements
 - <https://github.com/google/gps-measurement-tools>

What's new

Fixed bugs related to RINEX headers, gaps in measurements and more.

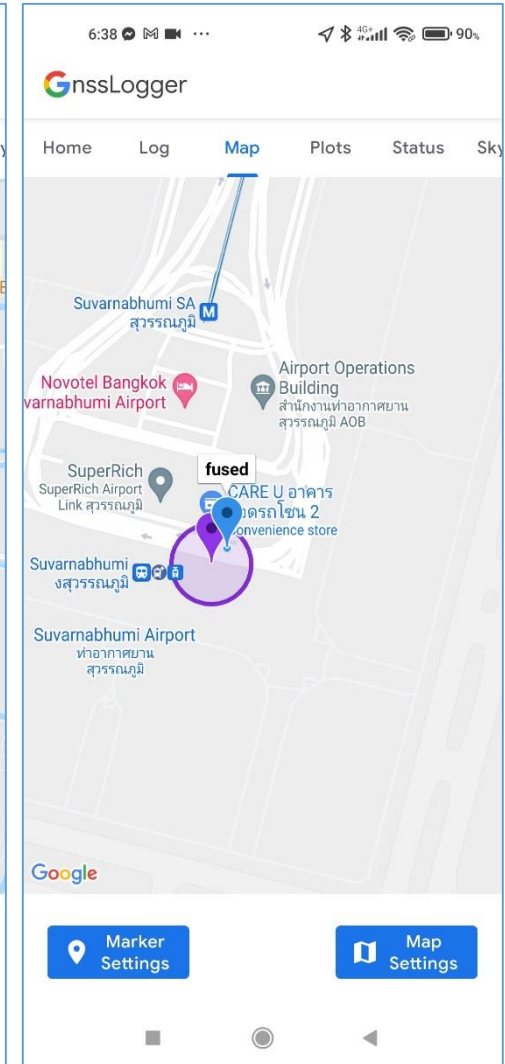

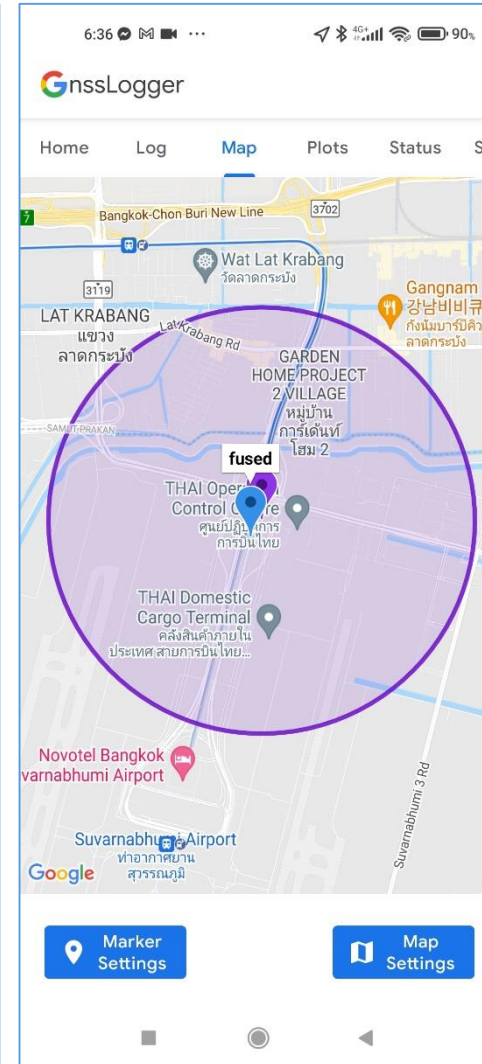

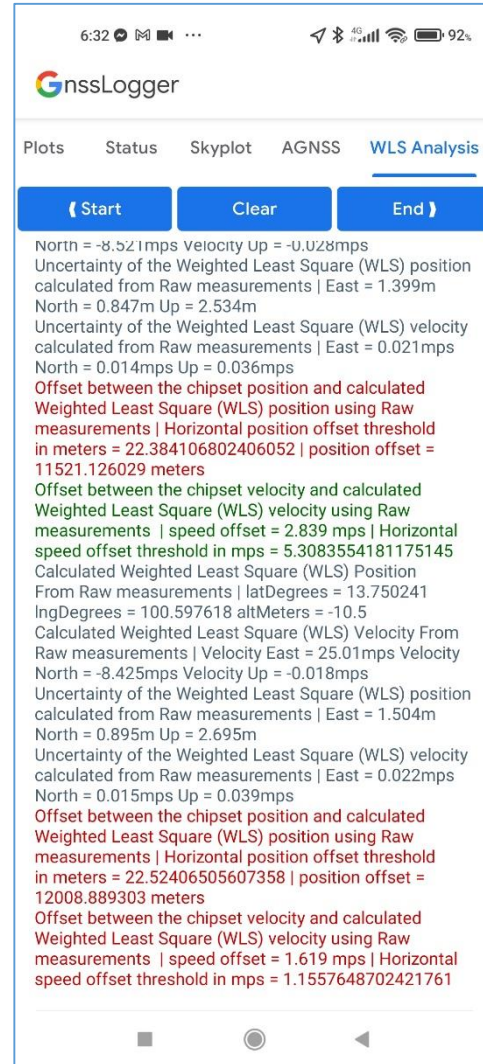

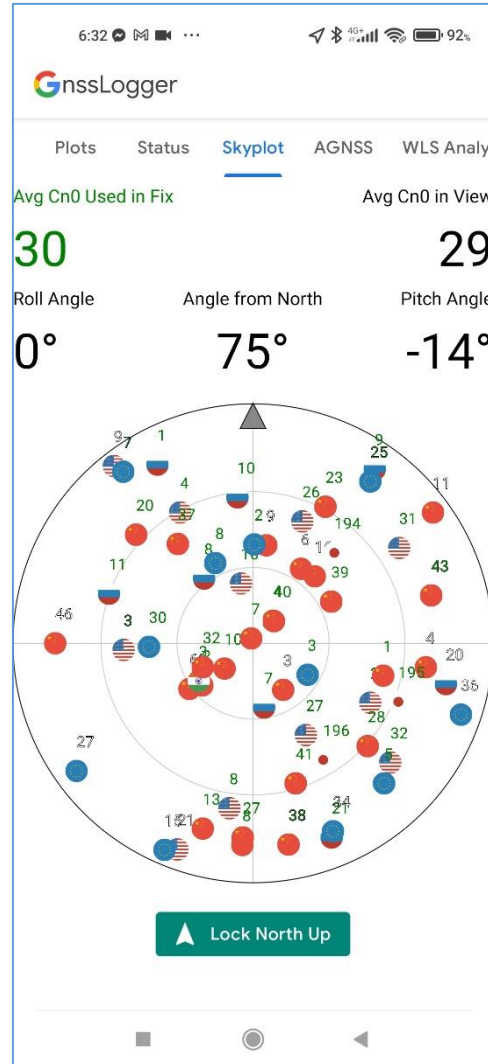

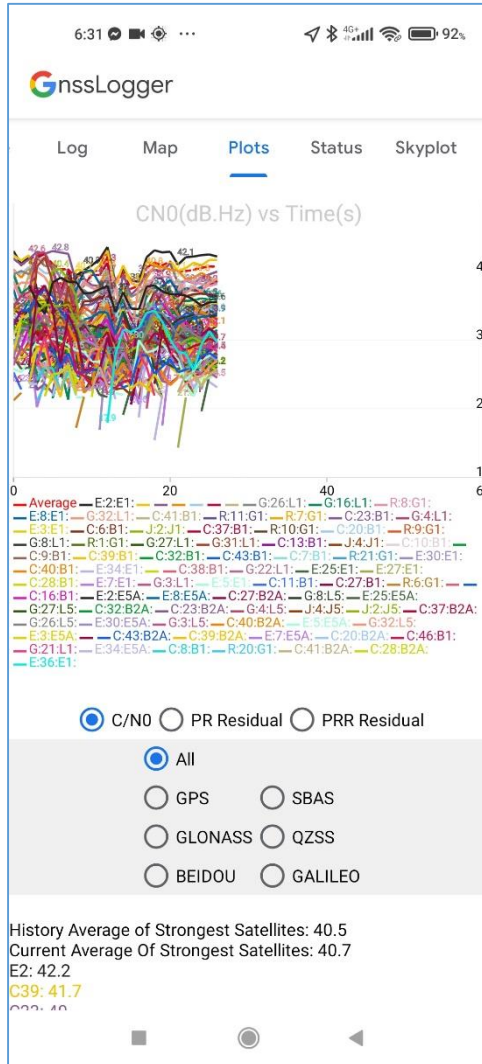

Data safety

Safety starts with understanding how developers collect and share your data. Data privacy and security practices may vary based on your use, region, and age. The developer provided this information and may update it over time.

- No data shared with third parties [Learn more about how developers declare sharing](#)
- No data collected [Learn more about how developers declare collection](#)

GPS Measurement Tool

The GNSS Analysis app is built on [MATLAB](https://www.mathworks.com/matlab), but you don't need to have MATLAB to run it. The app is compiled into an executable that installs a copy of the MATLAB Runtime.
