

SEE Universe 2020, organized by Serbian Office for Space Sciences, Research and Development (SERBSPACE), shall be the first South East Europe Space conference to be held at Science Technology Park, Belgrade, Serbia on 2 and 3 April 2020, which will include academic, educational and business panel, industry 4.0, technology and innovation session and space and society segment. SERBSPACE is a non-governmental organization, established in Belgrade in August 2016 with the general aim of developing space sector in Serbia. We are fulfilling these activities through three main pillars of our work: academia, industry and society. Please find more information at our website: www.serbspace.rs.

SEE Universe 2020 shall gather international and national stakeholders and experts from the domain of space sciences and industry. SERBSPACE believes that this conference will place Belgrade on a global map of innovation and industry 4.0, which shall enable development of national capacities, technology and innovation as well as international cooperation and knowledge exchange, all in service of sustainable development. More information is available here: www.seeuniverse2020.rs.

We are expecting between 100 and 150 participants from national and international universities and organizations, governmental and industry representatives. Call for abstract is now open, for more information about three thematic sessions and proposed topics, please visit: <https://www.seeuniverse2020.rs/register>.

Conference shall include three thematic sessions: Academia, Industry and Societies.
