Collaborative and Coordinated Shared Space based PPP for DRR

To Create **Global** Collaboration Framework Through Coordinated **Country** Specific "Pilot Project Demonstrations" — PPD's In Support of

> Global Platform for Disaster Risk Reduction Fourth Session, Geneva, Switzerland May 19-23, 2013

Need for Global Collaborative and Coordinated Public-Private-Partnership

Major global and regional Productive collaboration developments with Hyogo among multiple Framework for Action stakeholders To reduce vulnerability of A stronger and more sustainable disaster risk citizens worldwide to reduction and resilience hazards Outstanding issues and Development and use of challenges emerging Aerospace tools and technologies Crucial activities and Limited Objective Demonstrations - LOD's priorities Shared resources Reduced risks Multi-Countries-Regions Collective Safety & Sustainable Prosperity

Proposals for the Future

 Collaborative Pilot Projects involving UNOOSA, Industry, R&D Institutes and NGO's

Series of high level for atowards UNISPACE+50

- Partnerships covering Technical Advisory Missions, focused workshops and hands-on training programs on Small Satellites and systems
- Global Partnership covering satellite systems and data sharing

More and more businesses are incorporating social and environmental sustainability criteria in core business operations.

SPACE AS A DRIVER FOR SUSTAINABLE DEVELOPMENT

This remains a key challenge and opportunity for the 2030 development era, regardless of country of operation.

Very sophisticated and transparent techniques are being developed to align corporate long-term goals with global sustainability goals.
