# Space for Development Profile

## Key Purpose

- Supports the identification of targeted activities at country level by identifying gaps/opportunities in space application domains; it identifies changes over time;
- On a global level it can provide an aggregated view of general gaps and can be used as a reporting tool at global/UNOOSA level;
- Decision support tool for Member States and UNOOSA;
- It is connected to SDGs.

# Space Solutions Compendium

## Key Purpose

- Solutions that can be linked to indicators.
- MODULAR: any partner can propose solutions. Solutions need to be linked to an indicator (actually solutions could also propose a way of measuring the impact as impacts need to be measured)

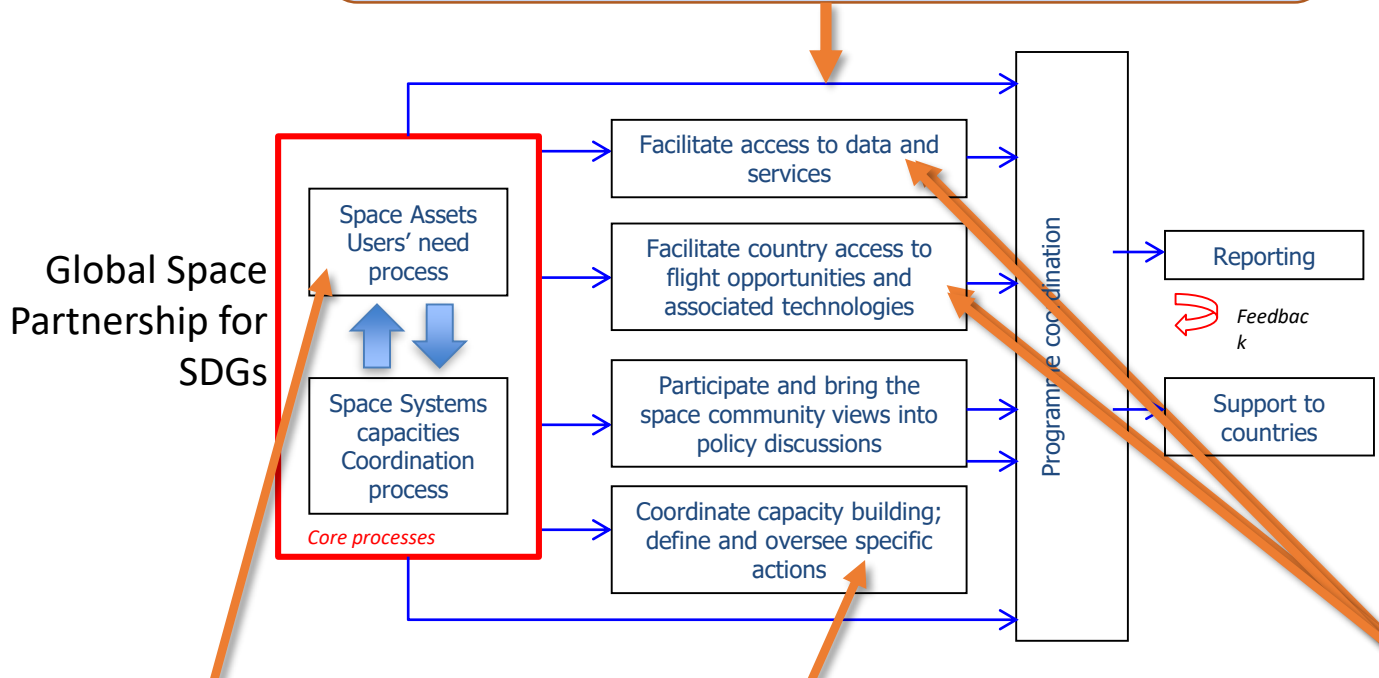

# Capacity Building Network ToR

- Network of universities, institutes, NGOs
- Commitment by members to implement a capacity building activity (fellowship programme, training course, event, ...) that supports Space2030
- The 2030 Agenda for Sustainable Development and the Space for Development Profile shall be guiding frameworks for the expected contributions of the CBN Members
- Members will report on the implementation and outcomes
- Membership is limited to a defined time period and automatically ends when the entity is no longer engaged in a relevant activity
- Members can present themselves as part of the “Capacity Building Network in support of the United Nations Office for Outer Space Affairs”
- UNOOSA will submit an annual report on the achievements of the CBN
- The CBN can be kick-started with a “Call for proposals”
- UNOOSA will provide no direct financial support to any of the CBN members
