

PROJECT IRAZU the first
Central America Satellite,
paving the way for the Space
Industry in COSTA RICA.

Launch: April 2nd 2018

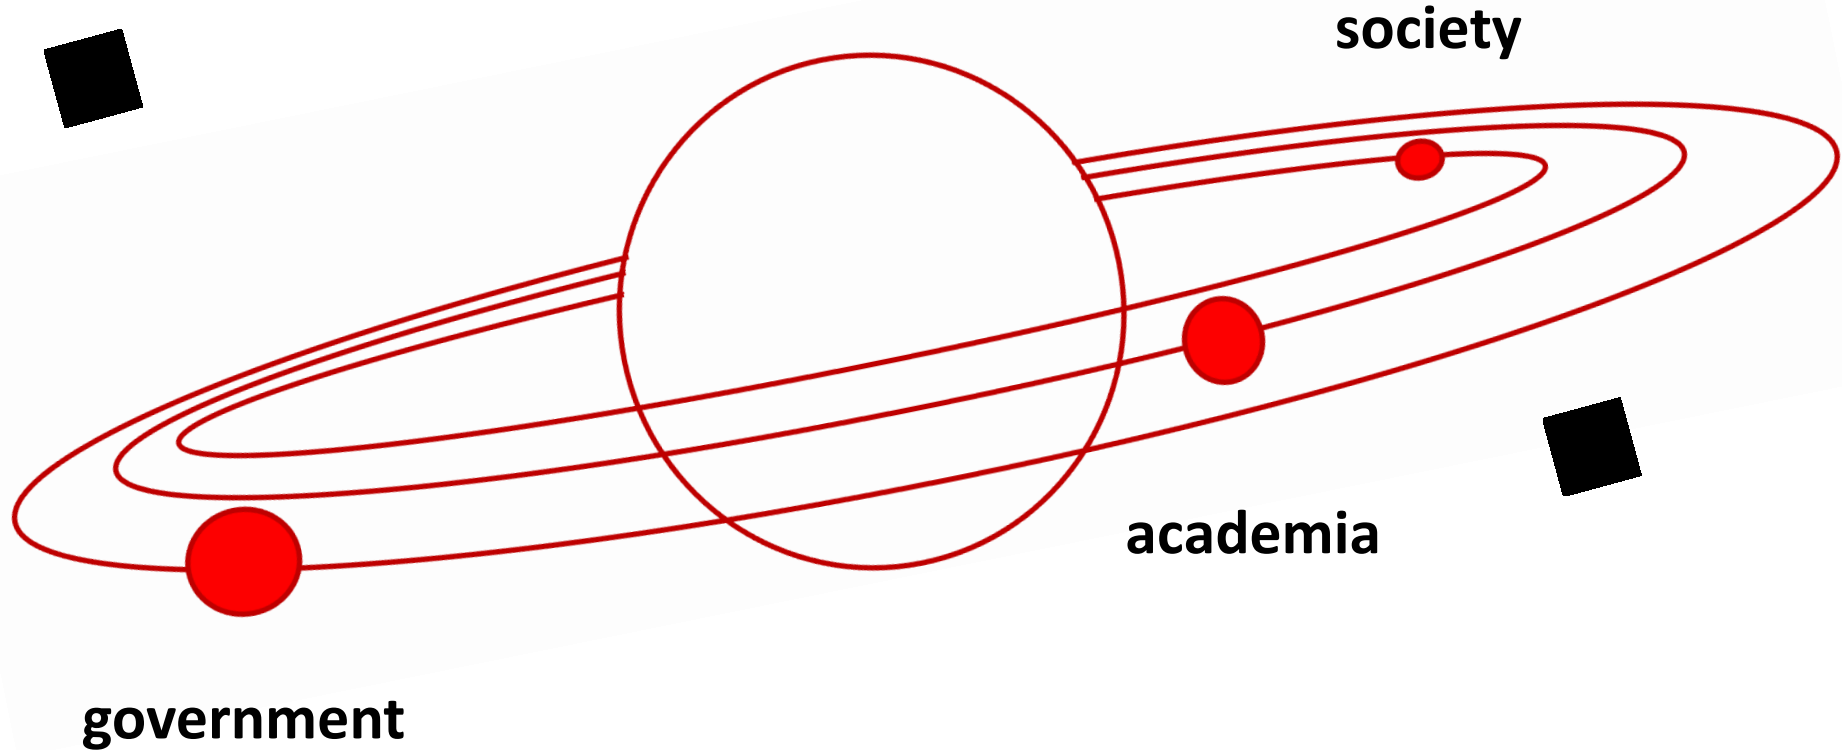

**Arrival to ISS:
April 5th, 2018**

**Deployment:
May 11th, 2018**

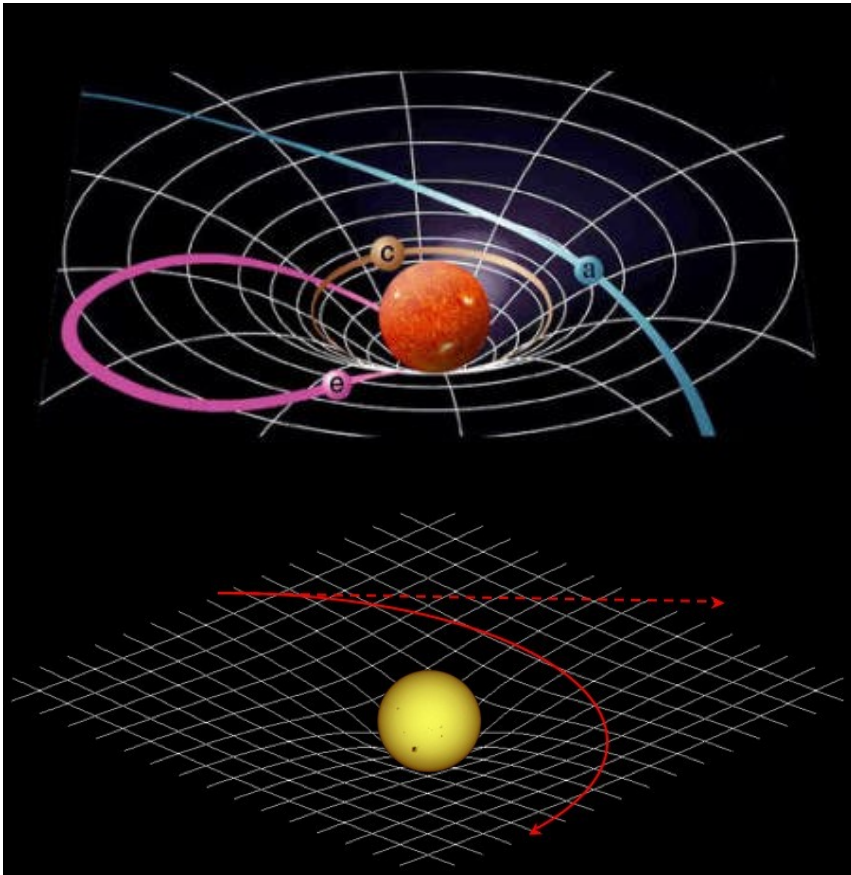

Space is hard

How does a small country gets there?

What mysterious force is capable of bending space and time and alter the course of the universe?

a) gravity

b) public opinion

paving the way for the Space Industry in COSTA RICA

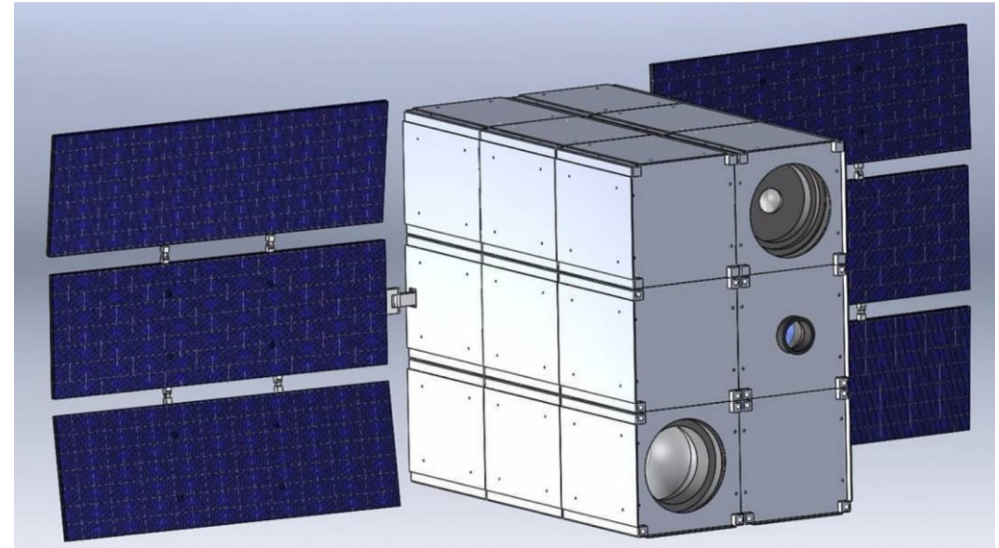

New creatures in the **Start-up** *Ecosystem*

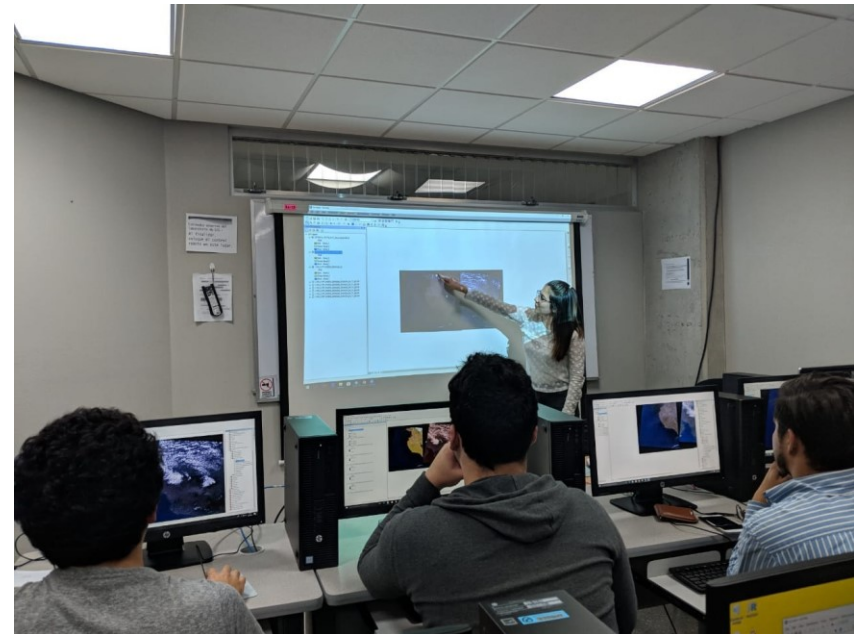

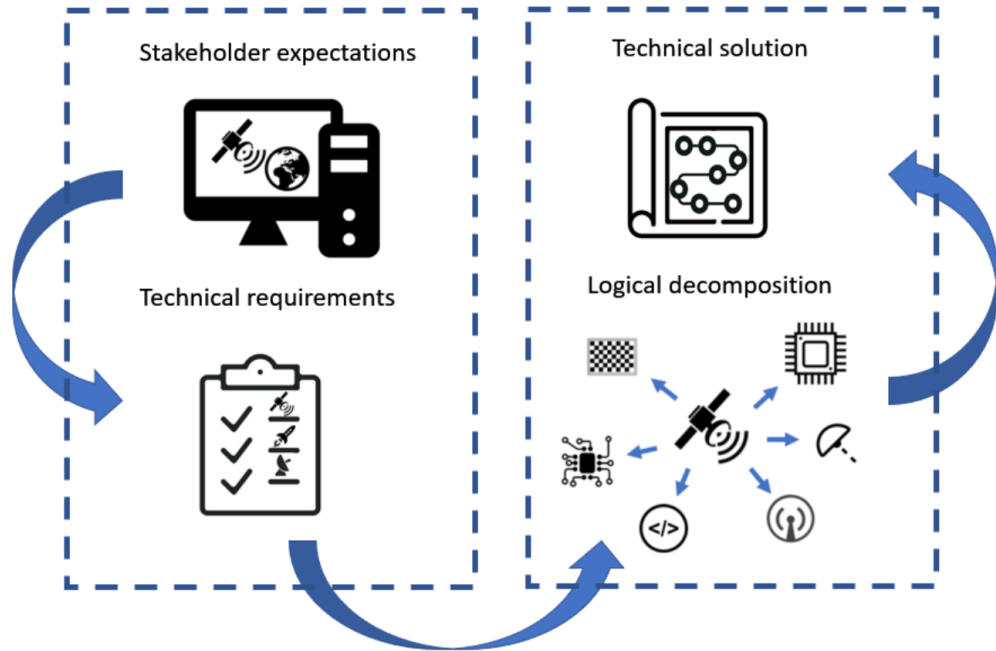

Requirement definition

Design solution

Since May 24th The Costa Rica Congress is discussing a bill for the creation of the Space Registry Office as part of the Costa Rica National Registry

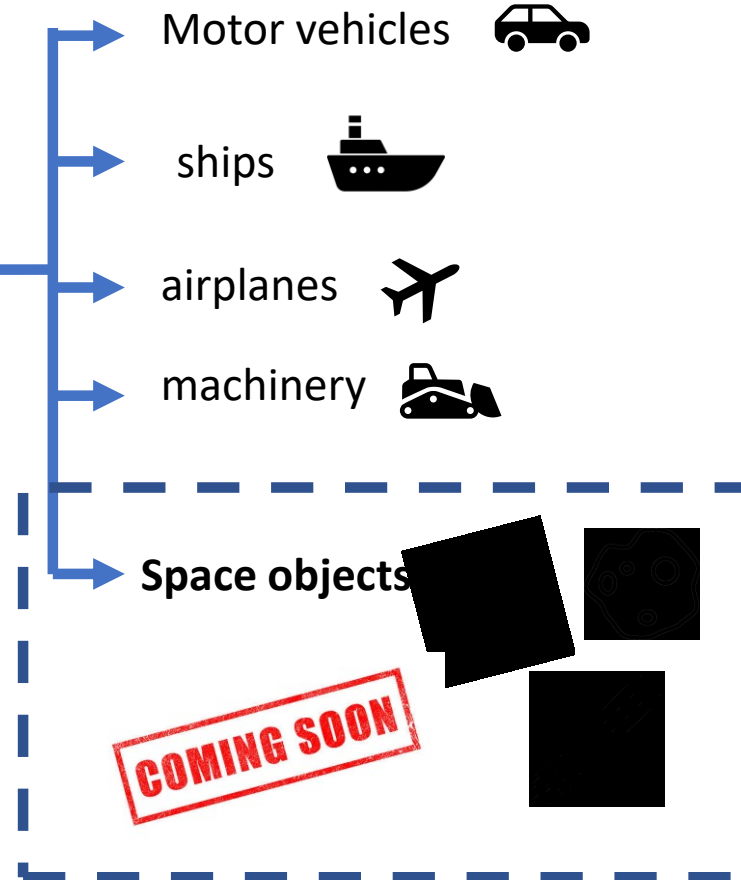

Crearán Registro de Objetos Espaciales

The Office creation responds to a responsibility of the country of maintaining an official record as established in the United Nations Convention on Registration of Objects Launched into Outer Space, which became a law of the land in 2010 after the congress approved bill 8838
