

# Welcome

**SIMONETTA DI PIPPO, DIRECTOR**

UNITED NATIONS  
Office for Outer Space Affairs

converting the prospects  
of space into reality  
will require a climate of  
genuine international  
cooperation

*President of Austria Franz  
Jonas opens UNISPACE I,  
1968*

without space,  
our modern world  
would not be  
possible

expertise from all  
corners of the global  
space community

the world has united  
around three  
agreements for global  
development

40% of the 169 indicators behind the 17 SDGs are reliant on space science and technology

6 CLEAN WATER AND SANITATION

11 SUSTAINABLE CITIES AND COMMUNITIES

15 LIFE ON LAND

in 2017 the world registered  
- through UNOOSA -  
a record 553 new objects in  
space

working with a growing list of COPUOS Member States to keep space's normative framework fit-for-purpose

through UN-SPIDER we're using space-based data to manage disaster cycles and mitigate environmental changes

A large, white, parabolic satellite dish antenna is mounted on a tall, white, cylindrical pedestal. The dish is tilted upwards and to the left. The background is a dramatic sky at sunset or sunrise, with orange and red clouds. In the foreground, there are some small buildings and trees. The overall scene is a mix of industrial and natural elements.

supporting international  
cooperation through the  
International Committee on  
Global Navigation Satellite  
Systems

as the UN's gateway to space  
we are building connections  
across the international community

records are being broken for international cooperation in space. Kenya's first satellite was launched from the International Space Station, the first time space hardware has been deployed under the auspices of the United Nations

*11 May, 2018*

we're working to ensure all countries  
have the opportunity to access space

partnerships with industry are helping  
bridge the space divide

welcome to  
UNISPACE+50.  
Enjoy!

UNISPACE  
+50 

THANK YOU
