2.1 Education and training

Master/ Ph.D Degree Program 2015

Remote Sensing and GIS **G**NSS **S**mall Satellite Technology **Enrollment**

- **17** Recommended by RCSSTEAP
- **24** Recommended by APSCO
 - Recommended by Partner of RCSSTEAP

All courses are offered in English and registration date will be in Sept. 2015

2.1 Education and training

1St 10 days Short Training Program 2015

International Aerospace and Satellite Applications (IASA) Training Program (2015)

- 6 days lectures
- 1.5 day technical visits
- 0.5 day participants' presentation
- 1 day lab work
- 1 day free
- Satellite Navigation Technology and Applications (April 19-29 implemented)
- Remote Sensing and GIS technology and Applications (September, Planed)
- Space Law and Policy workshop (October, Planned)

Reception Dinner	Feedback from the Trainees
<image/>	All the lectures are useful to us, but if we can extend the training cycle to get more practice, it would be perfect. All of the lectures are useful and the experts have delivered the presentations well. I have a suggestion due to the cultural visit, perhaps for the next event, the cultural visit would be better if we can go to several interesting places, not only just one place. This training was a really good experience. It was well organized, and the topics were very interesting for me. All lectures are very useful. Thanks for the great program make me more knowledgeable. The best seminar about the satellite navigation technology and application. Overall the program was useful of the GNSS theory, hardware and software, as well as applications within the program was uset perfect. It definitely achieved its goal of providing a comprehensive overview on some areas of GNSS theory, hardware and software, as well as applications. The program was very much useful for the GNSS users. It represented the status of GNSS technology in China as well as the world, it was well arranged and the lecturers provided their topics with the lasts technological advancement. All the lecturers were very friendly and delivered their lectures with excellent mode. The book with all presentations was very useful. All the presentations without exception were very high the answers of questions were dear and exact. The course provided very important information which think will be very useful to our countres. Excellent program gave a full dee about the satellite application and topics.
	It enhanced my knowledge. Congratulations to the program happening in such a perfect way. It has helped me to improve my understanding on GNSS. Thanks a lot. I would like to thank you for giving me the opportunity to attend this training course. It is an important and interesting course. This event is very well organized. I would like to thank you for all facilities that i have found. I would like to thank you for this great opportunity to participate into this training course at your university. I would like also to thank the volunteers and the tour guide, all the lecturers and all the responsible officers of this short training in China. Very good program, very organized and timely. Very exciting. Satellite navigation technology and application training program is very effective for me. I got a lot of knowledge and experiences of it. I can apply and use this experience in my research fields. It is well. All is well. This is one of the great trips. Thank you, See you again. Thank you for your staff to give me comfortable knowledge deeply in this field and good experience in China.
