**Committee on the Peaceful  
Uses of Outer Space**  
**Sixty-sixth session**  
Vienna, 31 May–9 June 2023  
Item 7 of the provisional agenda\*  
**Report of the Legal Subcommittee on its  
sixty-second session**

## **Compendium of space debris mitigation standards adopted by States and international organizations**

### **I. Background**

1. The development of a compendium of space debris mitigation standards adopted by States and international organizations was initiated in 2013 as a contribution of Canada, Czechia and Germany to the Committee on the Peaceful Uses of Outer Space, and in reference to the agenda item of its Legal Subcommittee on “General exchange of information and views on legal mechanisms relating to space debris mitigation measures, taking into account the work of the Scientific and Technical Subcommittee”. The aim of the compendium is to provide an overview of the current instruments and measures that have been implemented by States and international organizations.
2. At its fifty-seventh session, in 2014, the Committee on the Peaceful Uses of Outer Space expressed its appreciation to Canada, Czechia and Germany for the development of the compendium and requested the Secretariat to maintain the compendium on a dedicated page of the website of the Office for Outer Space Affairs.
3. At its sixty-fifth session, in 2022, the Committee welcomed recent updates and additions to the compendium of space debris mitigation standards adopted by States and international organizations and encouraged States and relevant organizations to contribute to the compendium ([A/77/20](#), para. 239).
4. The present conference room paper had been prepared by the Secretariat to inform the Committee of the updates made to the compendium.

### **II. Updates to the compendium of space debris mitigation standards adopted by States and international organizations**
